

ROVEMA

turning technology to profit.

ET

ROVEMA tray-packer
family – series ET

The ET-highlights

- Space-saving due to compact construction
- User-friendly layout
- Clearly structured and good accessible
- Easy on the product
- Ideal supplemented by innovative and productive grouping systems
- Rapid and safe format size exchange
- Innovative packing technology
- Optional enlargement for adjusted flexibility

**Intelligent
solutions for
individual demands.**

- Dosing
- Pillow Bags
- Cartoning
- Final Packaging

RT – Intelligent solutions for individual demands.

ET ROVEMA tray-packer family – series ET

The new tray-packer family, series ET represents the new ROVEMA philosophy for end-of-line packing. No matter which type you choose - each machine is compact, direct, fast and flexible. These packers are for all kinds of trays: without lid, with U-shaped lid, with hooded lid, inside or out. Based on this technology even stand alone machines for wrap-around or american case are available.

Easy on the product and sure to function

The whole packing process runs at one level. It is easy on the product and the package and ensures functional safety during the packaging process. With the hygienic design the machines of the series ET are accessible and visible from all sides and so they are very easy to clean. This series is supplemented by productive grouping systems as an ideal solution for the increasing demand of single row packing with high case output.

Effective and economic

A rapid format size exchange is possible in less than 10 minutes by application-oriented parameters, adjusting spindles and format parts. Thus downtimes are minimized and an economic and effective production process is ensured. Integrated into the whole packaging process a high automation will be reached with an excellent price-performance ratio.

Safe operation with ROVEMA P@ckControl

The Rovema control system ROVEMA P@ckControl guarantees an absolutely safe handling of the machines. The monitoring system and the integrated dynamic min/max limiting of the mechanical and physical values do not accept wrong or unreasonable data input. The operator can also use the integrated online-help with the comfortable navigation on the Touch Screen, if required.

Benefits and advantages on the ET

- **Space-saving** due to compact construction, fast, robust and solid
- **User-friendly** low arrangement of blank magazines side by side
- **Clearly structured and good accessible** as packing process runs at one level
- **Easy on the product** due to direct and gentle discharge of packages
- Ideal supplemented by innovative and **productive grouping systems**
- Rapid and safe format size exchange for **economic production**
- Optional **enlargement** for adjusted flexibility, additional functions and higher output
- **Innovative packaging technology** for all kinds of tray packages, without lid or with lid inside or out, with U-shaped lid or closed lid
