In order to fit packaging requirements like logistical and consumer benefits, reduction of packaging material and individual presentation at the point of sale, AMCOR FlexCan™ and Aqua FlexCan have been developed in a joint partnership between AMCOR FLEXIBLES and ROVEMA.

The result is an easy open, re-closeable, stand-up flexible container for powdered, granular, dry or particular food and non-food products or non-carbonated beverages, a flexible pack that retains its original shape and brand identity over the entire usage.

## The advantages

Manufactured economically with the continuously operating ROVEMA form-, fill and sealing technology, AMCOR FlexCan™ and Aqua FlexCan are capable of being a primary pack only with the following customer benefits:

### AMCOR FlexCan™

- consumer convenience
- innovative new pack design
- point of difference
- less weight
- environmentally friendly
- stability

### Aqua FlexCan

- the most attractive way to pack water
- ideal alternative to PET-bottle up to 250cc
- handsome, fresh, flexible
- environmentally friendly and non-leaking
- easy to handle – rip, squeeze, drink

## The technology

- Industrial PC with user-friendly touch screen for the machine control system
- Production programs stored individually
- User-definable sealing times and high sealing pressures
- Vacuum draw down for precise bag lengths - even for very awkward and thin films
- Patented process for continuous bag production
- Wear-free servo-motor main drive for cross sealing station

## Vertical form, fill- and seal machine VPK 260
